PROFESSIONAL SUMMARY

Senior Programmer Analyst with 14+ years of experience building and maintaining enterprise CRM, ERP, and billing applications on the Microsoft stack (C#, ASP.NET, SQL Server), with modern front-end work in React and TypeScript. Skilled in designing REST APIs, tuning database performance, and modernizing legacy modules for long-term maintainability.

TECHNICAL SKILLS

Front-End	React, TypeScript, JavaScript
Back-End	ASP.NET, C#, .NET Core, REST API Development, Web Services
Database	SQL Server 2008/2012/2016, MySQL, T-SQL, Stored Procedures
Architecture	Single Page Applications (SPA), Monolith to Modular Migration
Tools & DevOps	Visual Studio, IIS, Git, BitBucket

PROFESSIONAL EXPERIENCE

Senior Programmer Analyst — APA Engineering Pvt Ltd, Chennai

Aug 2014 – Present

GoCadence (Cadence CRM) — MONDIAL Automotive (B2B/B2C E-commerce Platform) | *ASP.NET 4.0, .NET Core, C#, React, TypeScript, Electron, SQL Server 2012, T-SQL, REST APIs*

- Built and enhanced modules of the enterprise CRM covering shopping cart, invoicing, dispatch, purchasing, stock management, accounting, credit notes, and payment processing.
- Contributing to a 2+ year initiative, led by a senior team member, to migrate a legacy ASP.NET application to a modern React front end backed by new .NET Core Web APIs, running in hybrid mode alongside the existing system with zero downtime.
- Developed and own critical business modules within the migration: Shopping Cart, Quote Management, Payment Gateway integration, Bulk Upload logic, and Part Search.
- Built and maintain multiple B2C e-commerce microsites, all centrally managed through the core GoCadence platform.
- Engineered a hybrid desktop app (Electron + React) as a lightweight version of GoCadence: uses the Web API when online, falls back to a local SQL Server Express instance offline, and syncs automatically on reconnect.
- Wrote complex T-SQL queries, stored procedures, and views; improved database performance for high-volume transactional data by redesigning queries, stored procedures, and indexes.

Associate .NET Developer — SAMI Technology Solutions, Chennai

Dec 2012 – Jul 2014

Vibgyor ERP Application | *ASP.NET 4.0, C#, SQL Server 2005*

- Developed modules of a multi-module ERP system covering sales, HR, finance, and procurement.
- Built sales module functionality covering customer records, quotations, sales orders, and invoicing.
- Implemented HR, finance, and procurement features such as employee records, purchase orders, vendor management, and financial reports.

Invoice Billing System | *C# (WinForms), SQL Server 2005*

- Built a desktop billing solution for multiple clients, automating invoicing, payment tracking, and reporting.
- Implemented item and customer masters, tax-based invoice generation, payment receipts, and outstanding tracking.
- Generated client-wise billing, payment, and outstanding reports to support day-to-day accounting.

AirWorldGroup.com | *ASP.NET 4.0, C#, SQL Server 2005*

- Developed a static business website to showcase travel and courier services.

Junior PHP Developer — Orange Lab IT Solutions, Chennai

Jun 2012 – Dec 2012

ePacific Mall | *Core PHP, MySQL*

- Developed an e-commerce platform with product management, shopping cart, and order processing.
